Subject: GREENEVILLE EMBARK

Sir,

CDR Waddle, CO Greenville, called. Today's embark with the Santa Barbara vy League and Orkin) group went exceptionally well (They want him to run for office). Length of the trip worked out perfectly. The boat showed them a brief, fed them prime rib, did angles and dangles, an emergency blow, put them in the torpedo tubes, gave deep-water samples and other boat memorabilia. The embark stirred emotions among the guests C(B)(6)

Very Respectfully,

C(B)(6)

Thanks [b6] I got the article from the Newspress Online and Barney Brantingham's article so you don't have to look for it.

Vr,

Subject: USS Greenville visit to Santa Barbara

All went well with USS Greenville's embark and arrival in Santa Barbara. All scheduled guests arrived and boarded on time and were treated to a first class day at sea. Director James Cameron commented to me that in all of his interactions with all of the services, this was the most personalized, red-carpet treatment he had received.

Greenville arrived on schedule in Santa Barbara. The first water taxi out to the sub carried Rep. [b6] s (accompanied by her COS, [b6]), Mayor [b6] , and local media (Santa Barbara News-Press, Santa Barbara Independent, Channel Communications, and KEY 1250 AM radio). Local radio reported broadcast live from topside via cell phone. Guests spent over two hours on board. Rep. [b6] was escorted by the CO, CDR Waddle. She was very impressed by the Nuclear Safety record of the Submarine Force. Diablo Canyon Nuclear Power Plant has caused quite a bit of concern to her constituents. She spent a considerable amount of time discussing the size of the sub force and nuclear concerns with the CO in the wardroom. She welcomed the sub and continued to interact with the CO and crew throughout their stay (dropping by a party the Yacht Club hosted for the crew).

4 copies of the Saturday, 1 July issue of the Santa Barbara News-Press have been mailed to LCDR Werner (home address). Greenville was on page A1 and on page B1. Two stories, both positive with lots of photos. Santa Barbara is a VERY liberal town and is opposed to Nuc weps and energy, that taken into consideration, the A1 article was as positive as it gets:

A1 Headline: NUCLEAR REACTION

Slug: "The city is putting aside its nuclear opposition as it welcomes the USS Greenville to town this weekend."

Lead: "When sailors from the USS Greenville are welcomed ashore this weekend, Santa Barbara's warm hospitality for the attack sub's servicemen will be torpedoing its political opposition to nuclear weapons and nuclear power."

B1 Headline: TAKING A DIVE

Lead: "When you're more than 700 feet under water in a submarine and you spot "Titanic" film director James Cameron, you wonder if you're ever going to see Santa Barbara again. Is this the man you want on board when there's more than tow football field lengths of salt water above you, a nuclear reactor down the hall and a load of huge green torpedoes stowed below? Great ingredients for a Cameron disaster movie. Except it was a great ride out of San Diego Friday as the USS Greenville tuned up for a cruise up to Santa Barbara today."

The Santa Barbara Independent has promised to send copies of their piece when it runs.

Vr,

[b6]
